

COVID-19 UPDATE

We, the staff and providers at AARA are monitoring the COVID-19 situation closely, during this pandemic. We know that many are worried about this outbreak as we treat a population already at risk due to their autoimmune diseases and treatment regimen.

As a result, we have enhanced our already rigorous cleaning procedures as well as instructed staff to follow additional safety precautions with our patients, staff, and within the office.

Additional Safety Precautions Include:

- ✓ Disinfecting common clinic areas on an ongoing basis
- ✓ Encouraging 20 second hand washing by patients prior to check in and by staff prior to rooming, evaluation, and checking out patients—and posting CDC hand washing instructions in all bathrooms and our break area
- ✓ Providing hand sanitizer at check-in and check-out locations
- ✓ Pre-screening for symptoms with our providers, associates and patients—prior to visits and at the time of visits
- ✓ Requiring sick associates to stay home

WE WILL CONTINUE TO MONITOR THIS SITUATION CLOSELY BY FOLLOWING THE CDC AND LOCAL HEALTH ORGANIZATIONS.
